

## RWE AG INSULATORS - GERMANY

Since 1990 ZINGA is being applied on insulator carriers on high tension pylons of the electricity company RWE-AG (= Rheinisch-Westfälische Elektrizitäts Aktien Gesellschaft).

In the fall of 2004 another 10.000 insulator carriers on high tension pylons have been zingaised by the applicator MUND.

ZINGA is applied by means of an airless spraygun in 2 layers of 60  $\mu\text{m}$  DFT.

System:  
Surface preparation: SA2,5 and Rz  
50-70 $\mu\text{m}$   
System:  
ZINGA  
2 x 60  $\mu\text{m}$  DFT
