

HØGABRU BRIDGE – NORWAY

This bridge was built in 1898. In 1992 the bridge was rebuilt and strengthened with new main steel beams, The whole steel structure was protected with 2 coats of 60 µm **ZINGA**. The 2 bottom photos of 2017 show the **ZINGA** protection **after 25 years**.

System:

ZINGA

2 x 60 µm DFT
