

## OMV PETROM – OIL PLATFORM – ROMANIA

OMV Petrom S.A. is a Romanian oil company, the largest corporation in Romania and the largest gas and oil producer in Eastern Europe. It is a subsidiary of OMV.

Apart from its operations in Romania, the company operates in Bulgaria, Serbia, Hungary, Moldova, Kazakhstan, Iran and Russia. In Moldova, Petrom has operated 73 filling stations, being one of the leading oil companies, alongside Lukoil. In Hungary, there have been at least 2 Petrom filling stations.

Between July and October 2013 ZINGA was used on the rehabilitation of an offshore oil platform. A ZINGA duplex system with sealer and topcoat system was applied after thorough surface preparation.

On 12 May 2014 Belrom '95 (Romanian ZINGA distributor) received a testimonial from OMV Petrom confirming the performance of the coating system thus far and indicating the use of ZINGA systems for other projects including oil platforms.

Compania : S.C. Belrom'95 S.R.L.  
Adresa : 100538 Ploiesti, str. Armasi nr. 31, jud. Prahova

Nume Destinatar : Adrian SOREANU  
Funcție : Director General

12.05.2014  
Scrisoare recomandare

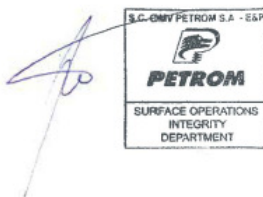

In perioada iulie - octombrie 2013, OMV - Petrom SA a avut ca proiect reabilitarea structurii metalice a platformei " Sector de Productie Istria Platforma 4" apartinand de ASSET X - Petromar

In acest sens s-au efectuat lucrari de sablare si vopsitorie folosindu-se produsele Zingametall - Belgia dupa urmatorul sistem:

Sablare: Grad de curatare Sa 2½  
Strat initial: Zinga grosime strat uscat min. 60 µm  
Strat intermediar: Alufer N grosime strat uscat min. 140 µm  
Strat final: PU Gloss grosime strat uscat min. 60 µm

Din partea firmei belgiene lucrarea a fost supravegheata de reprezentantul S.C. Belrom'95 S.R.L. care detine exclusivitatea promovarii si distributiei produselor Zingametall.

Apreciem pozitiv modul de punere in opera a produselor Zingametall - Belgia precum si comportarea sistemului sus mentionat pana in momentul de fata, drept pentru care aceste produse au fost promovate si pentru alte proiecte ale OMV-Petrom SA cum ar fi reabilitarea Sectiei de productie 3 cu o suprafata dubla fata de Sectia de productie 4 si folosirea produselor Zinga pentru lucrarile anuale de mentenanta a suprafetelor metalice si la celelalte platforme.

Recommendation letter  
In the period July to  
October 2013, OMV-  
Petrom SA performed a  
rehabilitation project on  
the steel structure  
platform « Industry Istria  
Production Platform 4 »  
belonging to ASSET X –  
Petromar.

In this regard, the  
structure was prepared by  
blasting and painting was  
conducted using products  
from Zingametall –  
Belgium by the following  
system:

#### **Blasting:**

Cleaning grade Sa 2 ½

#### **Initial layer:**

ZINGA min 60 µm DFT

#### **Intermediate coat:**

Alufer N min 140 µm DFT

#### **Finishing coat:**

PU Gloss min 60 µm DFT

From the Belgian company, work was supervised by representative SC Belrom'95 LLC who owns exclusivity for promotion and distribution of Zingametall products.

We appreciate operating facility of the products and the behavior of the above mentioned system until now, which is why these products were promoted for other projects of OMV Petrom SA such as restoration of Platform 4 which has double the surface of Platform 3 and use of ZINGA for annual work and maintenance of metal surfaces and other platforms.
