

PARKING COLUMNS & BRACINGS – FALUN HOSPITAL – SWEDEN

The **FALUN Hospital (Falu Lasarett)** is the first emergency hospital in Sweden. Today this hospital is the centre of specialist health care and has many specialities. It has some 450 beds distributed among 17 different clinics and wards. They have 3.300 dedicated staff providing the patients with personalised service.

The steel columns (12m H) and cross bracings of the 4 parking levels at **Falun Hospital**, under the Helipad, have been refurbished using a multiple layer system using products from different suppliers, of which **ZINGA** as a primer. The entire system was top coated with a fire-retardant system.

The coating system for the supporting beams & cross bracings on the 4 parking levels under the FALUN Hospital Helipad.

System:

ZINGA	1 x 60 – 90 µm DFT
Sealer TEKNOS Primer 5	1 x 30 µm DFT
Fire retardant HENSOTHERM K3	
	400 – 450 µm DFT
Top coat TEKNODUR 50	30 – 40 µm DFT
