

## ROOF BEAMS – GREAT ORME TRAMWAY MIDDLE STATION - UK

The **Great Orme Tramway**, located in South Wales, has been delighting visitors since it opened on July 31<sup>st</sup>, 1902. An engineering marvel of its age, it is the only cable-hauled tramway still operating on British public roads.

The 40 years' old previously hot-dipped steel structures (truss ties) were repaired using **ZINGA**. In December 2009, 2 coats of **ZINGA** were applied by **Colorado Corrosion** after having steam cleaned the surface.
